Availability: Available at short notice · Remote-first (open to hybrid or on-site) · Comfortable with US/EU time-zone overlap from IST

SUMMARY

AI Engineer with 10+ years of production software experience, now focused on GenAI tooling, MCP servers, AI agents, and Copilot-driven automation. On the Microsoft Xbox account at Tech Mahindra, I built the team's developer onboarding MCP server, and as AI Champion I ran weekly Copilot sessions, handled AI tools support day to day, and helped 17+ engineers get AI certified, working directly with Microsoft stakeholders in a client-facing role. CodeRush 2026 Finalist. Strong React, Next.js, TypeScript, and growing Python foundation, so I can own an AI tool end to end, from building it to supporting the engineers who use it.

CORE SKILLS

AI Tools Support & Enablement: GitHub Copilot rollout and troubleshooting, MCP server setup and debugging, developer onboarding automation, prompt engineering training, technical documentation, stakeholder communication, AI adoption programs

AI & GenAI: GitHub Copilot, Microsoft 365 Copilot, MCP (Model Context Protocol), AI Agents, RAG, Azure OpenAI, Azure AI Search, Prompt Engineering, LLM Application Development, Machine Learning on Google Cloud (Vertex AI, BigQuery ML), Responsible AI, Claude Code

Languages & Frontend: JavaScript (ES6+), TypeScript, Python, React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS

Cloud & DevOps: Azure, Azure DevOps, Google Cloud, Docker, CI/CD, GitHub Actions, PowerShell, REST APIs

Testing & Tools: Jest, React Testing Library, Playwright, Git, GitHub, JIRA, VS Code, Agile / Scrum

EXPERIENCE

Tech Mahindra Ltd

May 2024 – Present

AI Engineer & Full-Stack Developer, Microsoft Xbox Account (current)

- As AI Champion, drove org-wide AI tooling adoption: ran weekly GitHub Copilot and prompt-engineering enablement sessions, supported engineers with tool setup, configuration, and usage issues, and enabled 17+ engineers to earn AI White Belt certification.
- Built a production MCP (Model Context Protocol) server in TypeScript with 21 AI-powered tools, integrated with GitHub Copilot in VS Code, automating developer onboarding (VPN/PIM access, Docker, IIS, certificates, build, linting) and cutting setup from 2 weeks to under 30 minutes, saving 80+ hours per new developer.
- Engineered the support-critical parts of that automation: Node version isolation, dynamic IP detection and propagation, automated time-limited Azure PIM role activation via REST API, and a self-healing daily environment health check.
- Architected IncidentIQ, an agentic AI incident-response pipeline (Microsoft Agent Framework, Azure OpenAI, RAG over past incidents via Azure AI Search) that turns a production alert into a draft, merge-ready PR with mandatory human review. CodeRush 2026 Finalist (Top 6 of 70+).
- Designed and built ShieldAI, an AI-augmented pre-release CD gate (Playwright + GitHub Models / Azure OpenAI) where deterministic checks block and AI only advises, catching 5 classes of production breakage in ~30 seconds, with 51 passing tests.
- Designed the Xbox Configuration Migration Tracking System for modernization tracking, prioritization, and reporting.
- Leading the React 18 + TypeScript migration of a legacy Angular 1.x admin portal (~20 pages) in a Yarn-workspaces monorepo, with zero backend changes and reusable patterns adopted across the team.

Senior Software Engineer, AT&T (earlier engagement at Tech Mahindra)

- Built and maintained core customer-facing modules (Product Listing, Offers, Deals, Flag Management) and reusable React components on the AT&T design system, with 90%+ test coverage (Jest, React Testing Library).
- Delivered features on att.com through a ticket-driven workflow and optimized conversion with Adobe Target A/B testing.

Tata 1mg

Aug 2019 – May 2024

Software Development Engineer II, Digital Consumer Healthcare Platform

- Refactored and built products with React.js, improving performance by 30% and reducing code complexity by 40%.
- Built a Progressive Web App from scratch with code-splitting and performance optimization.
- Delivered the online doctor consultation interface, reducing booking time by 30% and improving engagement.

PulpStrategy Pvt. Ltd.

Sep 2015 – Aug 2019

Senior Web Developer

- Delivered responsive, accessible web and mobile applications for diverse clients: hotel booking, drag-and-drop app builders, e-commerce, and NGO platforms.

LimeTray

Nov 2014 – Jul 2015

Front-End / UI Developer

- Built restaurant SaaS interfaces with cross-browser compatibility and strong web/mobile performance.

Dream Soft Infotech Pvt. Ltd.

Mar 2014 – Oct 2014

Software Trainee (Apprenticeship)

- Converted designs to HTML/CSS and used jQuery to build interactive web pages.

CERTIFICATIONS

GitHub Copilot Certification (2026) · AI White Belt · Prompt Engineering for Everyone (2025) · Claude Code 101 · Introduction to Generative AI · Introduction to Large Language Models · Introduction to AI & ML on Google Cloud · MLOps (Getting Started, for Generative AI, Vertex AI Model Evaluation) · Create ML Models with BigQuery ML · Python Programming (2025) · Scrum Master with Jira · Front-End Web Development (Udacity) · JavaScript & CSS (HackerRank)

RECOGNITION

- AI Champion, Microsoft Xbox account: org-wide AI adoption and weekly Copilot enablement.
- CodeRush 2026 Finalist, IncidentIQ (Top 6 of 70+).
- Multiple Pat on the Back awards from the Tech Mahindra IBU head, plus direct appreciation from Microsoft stakeholders.

EDUCATION

Bachelor of Computer Applications, Glocal University, UP	2019
Bachelor of Arts, University of Delhi	2013
Web Design, Arena Animation, Delhi	2011
