Availability: Current client project concludes 30 June 2026; available to join thereafter with a 15-day notice period.

SUMMARY

AI Engineer and full-stack developer with 11+ years building production software, now focused on GenAI automation, MCP servers, AI agents, and Copilot-driven developer tooling. Recognized as an AI Champion and a CodeRush 2026 Finalist for practical, measurable innovation. Strong React/Next.js and TypeScript foundation with hands-on Google Cloud GenAI and MLOps training. I build AI features as real, deployed software and drive the adoption that makes them stick.

CORE SKILLS

AI & GenAI: GitHub Copilot, Microsoft 365 Copilot, MCP (Model Context Protocol), AI Agents / Agentic Workflows, RAG, Azure OpenAI, Azure AI Search, Microsoft Agent Framework, Prompt Engineering, LLM Application Development, Responsible AI, AI Adoption & Enablement

ML & MLOps: MLOps (Vertex AI), BigQuery ML, ML on Google Cloud, Vertex AI Notebooks

Languages & Frontend: JavaScript (ES6+), TypeScript, React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Material UI

Cloud & DevOps: Azure, Google Cloud, Docker, CI/CD, GitHub Actions, Azure DevOps

Architecture & Practices: Micro Frontend, Design Systems, SSR, PWA, REST APIs, GraphQL, Agile / Scrum

Testing & Tools: Jest, React Testing Library, Git, GitHub, GitLab, JIRA, Figma

EXPERIENCE

Tech Mahindra Ltd

May 2024 – Present

AI Engineer & Full-Stack Developer, Microsoft Xbox Account (current)

- Built a production MCP (Model Context Protocol) server in TypeScript (21 AI-powered tools, ~6,000 lines) integrated with GitHub Copilot in VS Code, automating developer onboarding (VPN/PIM access, Docker, IIS, certificates, build, and linting) and cutting setup from ~2 weeks to under 30 minutes, saving 80+ hours per new developer.
- Engineered the hard parts behind that automation: Node version isolation, dynamic IP detection and propagation, automated time-limited Azure PIM role activation via REST API, and a self-healing daily environment health check.
- As an AI Champion, ran weekly Copilot and prompt-engineering sessions and enabled 17+ engineers to earn AI White Belt certification, driving org-wide AI adoption.
- Architected IncidentIQ, an agentic AI incident-response pipeline (Microsoft Agent Framework, Azure OpenAI, RAG over past incidents via Azure AI Search) that turns a production alert into a draft, merge-ready PR with mandatory human review; a CodeRush 2026 Finalist (Top 6 of 70+).
- Designed and built ShieldAI, an AI-augmented pre-release CD gate (Playwright + GitHub Models / Azure OpenAI) where deterministic checks block and AI only advises, catching 5 classes of production breakage in ~30 seconds, with 51 passing tests.
- Designed the Xbox Configuration Migration Tracking System for modernization tracking, prioritization, and reporting.
- Leading the React 18 + TypeScript migration of a legacy Angular 1.x admin portal (~20 pages) inside a Yarn-workspaces monorepo, with zero backend changes and reusable patterns (saga-per-domain, LCE state, inline modals) adopted across the team.

Senior Software Engineer, AT&T (earlier engagement at Tech Mahindra)

- Built and maintained core customer-facing modules (Product Listing, Offers, Deals, and Flag Management) and reusable React components on the AT&T design system, achieving 90%+ test coverage with Jest and React Testing Library.
- Delivered new features and improvements on att.com to client-defined UI specifications, managing the work through a ticket-driven delivery workflow.
- Optimized site performance and user experience using Adobe Target for A/B testing and conversion-focused experiments.

Tata 1mg

Aug 2019 – May 2024

Software Development Engineer II, Digital Consumer Healthcare Platform

- Refactored and built products with React.js, improving performance by 30% and reducing code complexity by 40%.
- Built a Progressive Web App from scratch with proper code-splitting and performance optimization.
- Delivered the online doctor consultation interface, reducing consultation booking time by 30% and improving user engagement.

PulpStrategy Pvt. Ltd.

Sep 2015 – Aug 2019

Senior Web Developer

- Delivered responsive, accessible web and mobile applications for diverse clients: hotel booking platforms, drag-and-drop app builders, e-commerce, and NGO platforms.

LimeTray

Nov 2014 – Jul 2015

Front-End / UI Developer

- Built restaurant SaaS interfaces, ensuring cross-browser compatibility and strong performance across web and mobile.

Dream Soft Infotech Pvt. Ltd.

Mar 2014 – Oct 2014

Software Trainee (Apprenticeship)

- Converted designs to HTML/CSS and applied jQuery to build interactive web pages.

CERTIFICATIONS

GitHub Copilot Certification (2026) · AI White Belt · Prompt Engineering for Everyone (2025) · Introduction to Generative AI · Introduction to Large Language Models · Introduction to AI & ML on Google Cloud · MLOps (Getting Started, for Generative AI, Vertex AI Model Evaluation) · Create ML Models with BigQuery ML · Python Programming (2025) · Scrum Master with Jira · Front-End Web Development (Udacity) · JavaScript & CSS (HackerRank)

RECOGNITION

- AI Champion, Microsoft Xbox account.
- CodeRush 2026 Finalist, IncidentIQ (Top 6 of 70+).
- Multiple Pat on the Back awards from the Tech Mahindra IBU head, plus direct appreciation from Microsoft stakeholders.

EDUCATION

Bachelor of Computer Applications, Glocal University, UP	2019
Bachelor of Arts, University of Delhi	2013
Web Design, Arena Animation, Delhi	2011
